

v0.8 Disease Models: Summary Dashboard

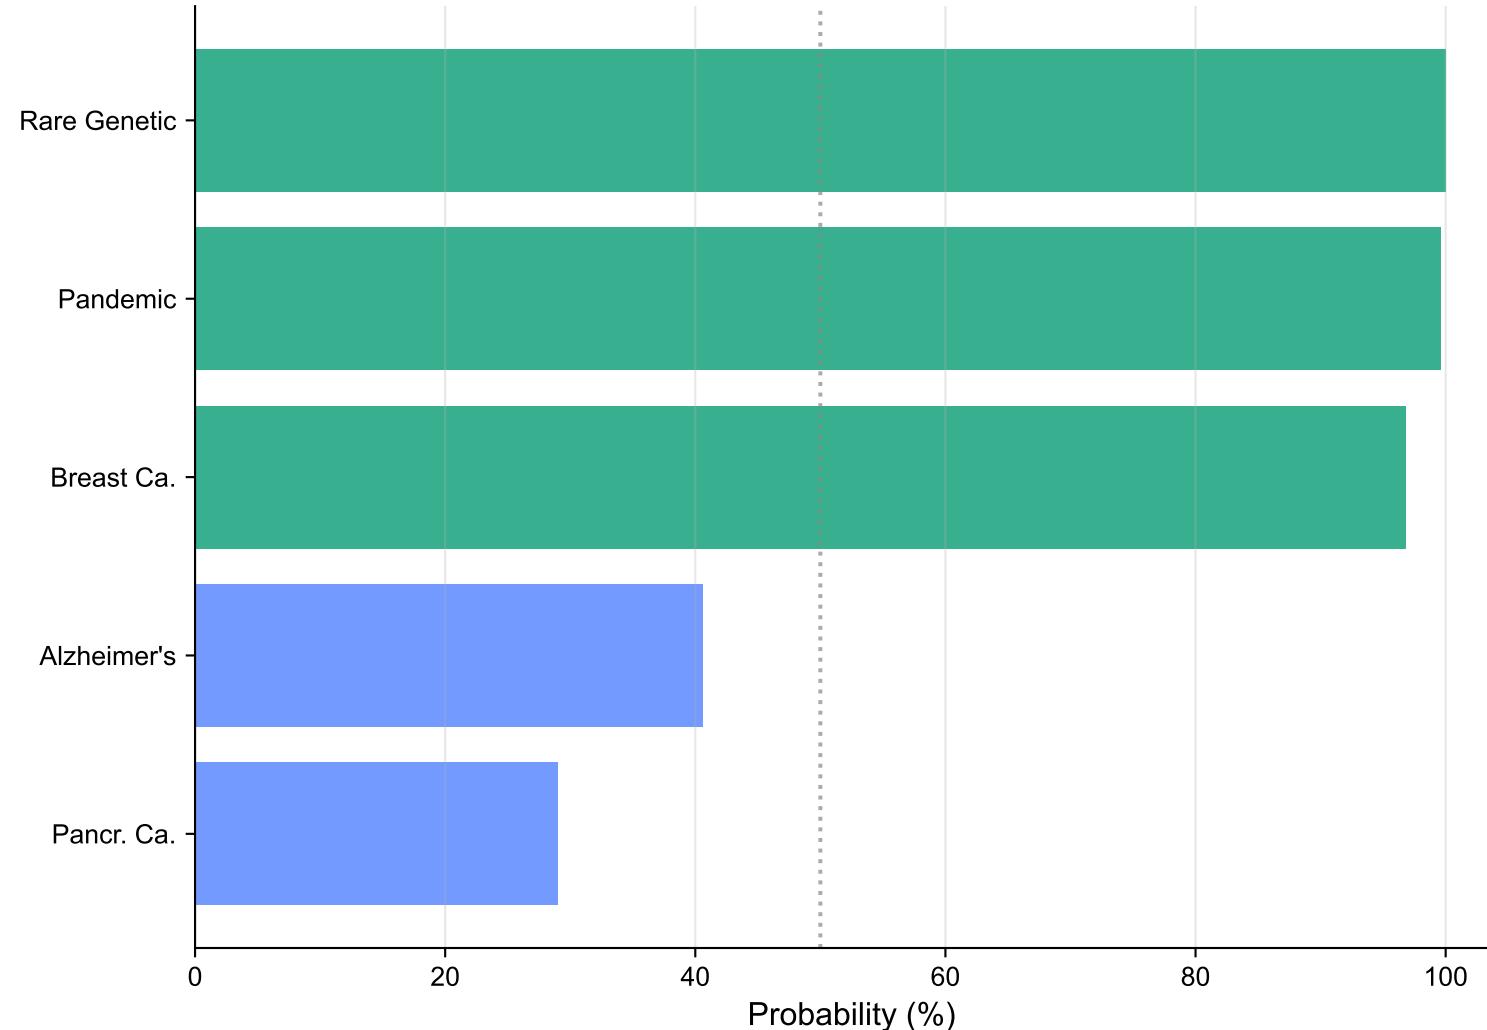

A. Progress Trajectory vs. Amodei Target

B. Time to Cure (Baseline)

C. Cure Probability by 2050

D. Key Metrics Summary

KEY FINDINGS (v0.8 Disease Models)

- PROGRESS PROJECTIONS (2050)
 - Baseline: 149 equivalent years
 - Amodei Target: 229 equivalent years
 - Gap: 35% below Amodei

PATIENT IMPACT

- Total Beneficiaries: 1.6 billion by 2050

TOP OPPORTUNITIES

- Fastest cure: Pandemic pathogens (2-3 years)
- Highest impact: Alzheimer's (170M+ patients)

KEY BOTTLENECK

- Phase II trials remain rate-limiting
- CNS diseases face additional barriers
