P1-6: Exponential vs Logistic AI Growth
Logistic growth saturates at capability ceiling

Legend:
- Exponential (v1.0)
- Logistic (v1.1 - P1-6)
- Capability ceiling (100.0)

Logistic saturation:
$A(t) = A\_max / (1 + (A\_max-1) \cdot e^{(-g \cdot t)})$

X-axis: Year
Y-axis: AI Capability Index $A(t)$
